121 Progress in Fish Vaccinology

Editor: P.J. Midtlyng, Oslo, Norway

XII + 340 p., 56 fig., 35 tab., soft cover 2005. ISBN 3-8055-7936-5

“This volume gives a comprehensive update on recent developments in fish vaccinology and the potential and current use of vaccines in modern fish farming. Among the topics presented in 25 overview articles and original contributions are:

- new findings on immune mechanisms in fish and crustaceans
- update on bacterial and viral vaccines for farmed fish
- overview of adjuvant technology and mechanisms causing adverse effects
- bath immunisation using ultrasound, and oral vaccination methods
- development of recombinant, live and DNA vaccines for fish
- critical assessment of regulatory standards and tests
- immunological control of reproduction

The book will be an indispensable aid and source of up-to-date information for fish health professionals, managers in the aquaculture industry, and industrial researchers working in the field of fish immunology, vaccine development and disease control world-wide.”

KARGER

Contents

Session I

Vaccination for Disease Control – Status and Future Potential

Chair: *Geoffrey C. Schild*

The Need for Effective Disease Control in International Aquaculture

B. Hill

Eradication Versus Vaccination Strategies to Control Infectious Diseases - Some Lessons to be Learned from Terrestrial Animals

V. Moennig

Session II

Recent Progress in Fish and Crustacean Immunology

Chair: *Teruyuki Nakanishi*

Adaptive Immunity in Teleosts: Humoral Immunity (Abstract)

L. Pilström

Adaptive Immunity in Teleosts: Cellular Immunity

C.J. Secombes, S. Bird, J. Zou

Immune Functions in Crustaceans: Lessons from Flies

R.J.M. Stet, J.A.J. Arts

Identification of Expressed Genes on Carp (*Cyprinus carpio*) Head Kidney Cells in Vitro Treatment with Immunostimulants

M. Sakai, T. Kono, R. Savan

Session III

Update on New Vaccines for Fish

Chair: *Anthony E. Ellis*

Bacterial Vaccines for Fish – An Update of the Current Situation Worldwide

T. Håstein, R. Gudding, Ø. Evensen

Update on Bacterial Vaccines: *Photobacterium damsela* subsp. *piscicida*

A.C. Barnes, N.M.S. dos Santos, A.E. Ellis

Vaccination Strategies to Prevent Emerging Diseases for Spanish Aquaculture

J.L. Romalde, C. Ravelo, S. López.Romalde, R. Avendaño-Herrera, B. Magariños, A.E. Toranzo

Update on Viral Vaccines for Fish

E. Biering, S. Villoing, I. Sommerset, K.E. Christie

Session IV

New Adjuvants, Formulation Technologies and Delivery Methods

Chair: *Patrick Smith*

The Vaccine Formulation and its Role in Inflammatory Processes in Fish - Effects and Adverse Effects

Ø. Evensen, B. Brudeseth, S. Mutoloki

Vaccine Adjuvant Technology: From Theoretical Mechanisms to Practical Approaches

V.E.J.C. Schijns, A. Tangerås
Immunisation of Fish by Bath Immersion Using Ultrasound
N. Navot, E. Kimmel, R.R. Avtalion
Development of a Cost-Effective Oral Vaccination Method Against Viral Disease in Fish
A.R. Companjen, D.E.A. Florack, J.H.M.W. Bastiaans, C.I. Matos, D. Bosch, J.H.W.M. Rombout

Session V

Recombinant and Live Vaccines for Fish

Chair: *Scott LaPatra*

Recombinant Subunit Vaccines: Potentials and Constraints
T.G. Clark, D. Cassidy-Hanley
Development of a Subunit Vaccine for Infectious Pancreatic Necrosis Virus Using a Baculovirus Insect/Larvae System
R.V. Shivappa, P.E. McAllister, G.H. Edwards, N. Santi, O. Evensen, V. Vakharina
An Oral Delivery System for Recombinant Subunit Vaccine to Fish
J.H.-Y. Lin, C.-C. Yu, C.-C. Lin, H.-L. Yang
The Place of Marker Vaccines in Control and Eradication of Animal Diseases – Aspects of Comparative Interest
P.-P. Pastoret
Use of *Arthrobacter davidanieli* as a Live Vaccine Against *Renibacterium salmoninarum* and *Piscirickettsia salmonis* in Salmonids
K. Salonijs, C. Siderakis, A.M. MacKinnon, S.G. Griffiths

Session VI

DNA Vaccination of Fish – Successes and Constraints

Chair: *Michel Bremont*

Overview of Recent DNA Vaccine Development for Fish
G. Kurath
DNA Vaccines – Regulatory Perspectives (Abstract)
G.C. Schild

Session VII

Regional and International Standards for Approval of Vaccines for Fish

Chair: *Tonje Høy*

Critical Assessment of Regulatory Standards and Tests for Fish Vaccines
P.J. Midtlyng
European Pharmacopoeia (EP), USDA and MAFF Standards – Will they ever be Harmonised under the VICH Umbrella ?
P. Castle
Regulatory Constraints as Seen from the Pharmaceutical Industry
G. Galligani, I. David-Andersen, B. Fossum

Session VIII

Societal Aspects of Vaccination in Aquaculture

Chair: *Brit Hjeltnes*

Vaccination and Consumer Perception of Seafood Quality
M. Engelstad

The Choice of Disease Control Strategies to Secure International Market Access for Aquaculture Products

S. Chinabut, S. Puttinaowarat

Session IX

Vaccinology – More than Disease Prevention ?

Chair: *Roar Gudding*

Vaccines for the Control of Reproduction – Status in Mammals, and Aspects of Comparative Interest

P.J. Delves, I.M. Roitt

Poster Session
